1800 Series Foam Mattress Specifications

GENERAL:
All mattresses shall be manufactured in accordance with the best practice known to the manufacturing industry and shall be clean and free from defects in material and workmanship and shall meet the sanitary conditions as required by the appropriate state.

TICKING:
Anti-Bac™ - A very effective vinyl fabric reinforced with polyester scrim. It is antistatic, non-allergenic and tear resistant and it offers complete fluid barrier protection that is easy to clean. It is also an anti-microbial fabric that will combat bacteria, mildew and fungal growth. The mattress ticking meets the flammability requirements of NFPA 701 (small scale) and Cal 117.

Foam Core:
The 1800 series mattress uses 1.8# per cubic ft. density foam. The ILD (firmness rating) is 30 lbs.

Construction:
The cover for the mattress is sewn in such that the seams are inverted. The construction is in a box form. One end of the mattress in folded into an envelope style closure then sewn shut. The stitching is a lock stitch therefore eliminating unraveling of the stitching. The thread is a very strong Bonded nylon (BN-69).

FLAMMABILITY TESTING REQUIREMENTS:

The 1800 Series Mattress meets the following flammability test criteria:

1. Consumer Product Safety Commission (FF4-72 as amended) part 1632 Flammability Standard for Mattresses – cigarette ignition test for mattresses.
2. Consumer Product Safety Commission 16 CFR Part 1633 - Standard for the Flammability (Open Flame) of Mattress Sets.
3. Meets CAL TB 603 Flammability Test on Mattresses
4. Meets Canada standard CGSB-4.2 for “Combustion Resistance of Mattresses- Cigarette Test”.

ADDITIONAL REQUIREMENTS:
All mattresses are to be packaged in a 3-5 mil plastic bags.
